InterScan™ Messaging Security for Crossbeam Systems

➔ KEY BENEFITS

- **#1 in Anti-Spam Effectiveness¹**
Trend Micro achieved #1 in anti-spam in independent tests
- **#1 in Antivirus Market Share²**
Trend Micro is #1 in gateway antivirus market share for seven consecutive years
- **Flexible Content Filtering**
Organizations can customize messaging rules based on their individual regulatory and policy needs
- **Easy Management**
Centralized management through a single web-based console provides coordinated control for easy administration
- **Lower Total Cost of Ownership**
Crossbeam Systems offers consolidated security infrastructure with higher availability and performance

Enterprises are experiencing a dramatic increase in email-based attacks on their messaging infrastructures, putting company assets at risk. To combat these widening email threats, organizations need a comprehensive messaging security solution that stops threats at the gateway before they penetrate the network.

Now certified for Crossbeam Systems™ X-Series and C-Series devices, InterScan Messaging Security Suite integrates powerful anti-spam and anti-phishing with award-winning antivirus and anti-spyware. This comprehensive email protection also provides content filtering to enforce compliance and prevent data leakage. Crossbeam Systems offers customers the ability to consolidate enterprise-wide security solutions on one high-capacity platform, improving manageability, scalability, and performance while reducing costs. InterScan Messaging Security Suite on Crossbeam Systems platforms delivers superior availability while blocking the full range of email threats.

BLOCKS EMAIL-BASED VIRUSES AND SPYWARE

Award-winning antivirus technology blocks malware, including spyware attacks. Zero-day protection blocks unknown and targeted viruses with automated recommended virus responses.

BLOCKS SPAM BEFORE REACHING THE GATEWAY

Trend Micro provides three distinct tiers of anti-spam and anti-phishing protection. Trend Micro™ Email Reputation alone stops up to 80% of threats before they reach the gateway, using the world's largest, most reliable reputation database and a dynamic service that stops threats as they emerge. IP Profiler provides customer-specific reputation services and a firewall against DHA and bounced mail attacks. The robust composite engine applies cutting-edge techniques to block any remaining spam and phishing emails from entering the inbox.

FILTERS UNWANTED CONTENT

Content filtering enforces regulatory compliance, aids corporate governance, and prevents data loss. Security policies can target senders or recipients by company, group, or individual, and provide flexible remediation options.

OFFERS MANAGEMENT EASE AND FLEXIBILITY

Single web-based management console centralizes policy, quarantine, archive, logging, and reporting, while LDAP integration, delegated administration, and message tracking simplify administration.

InterScan™ Messaging Security for Crossbeam Systems

COMPLEMENTARY PRODUCTS

Centralized Management

- Trend Micro Control Manager™

Web Security Products

- InterScan™ Web Security Suite

Mail Server Security Products

- ScanMail™ for Microsoft™ Exchange
- ScanMail™ for Lotus™ Domino™

PROTECTION		Standard	Advanced
Antivirus	Blocks malware, including zero-day and spyware attacks	✓	✓
Content Filtering	Supports regulatory compliance and corporate governance as well as prevents loss of confidential information	✓	✓
Email Reputation	Stop threats before the gateway with global and dynamic reputation services		✓
IP Profiler	Applies customer-specific reputation services and a firewall against DHA and bounced mail attacks		✓

SOLUTION SPECIFICATIONS

Software

- InterScan Messaging Security Suite for Crossbeam X-Series
- Crossbeam XOS 7.3
- InterScan Messaging Security Suite for Crossbeam C-Series
- Crossbeam COS 6.0

Hardware

X-Series:

APM 8600

- 1 or 2 Xeon Dual-Core CPU
- 2GB RAM (4GB optional)
- 80GB SATA HDD (optional 2nd HDD)

APM 8400

- 1 or 2 Xeon CPU
- 2GB RAM (4GB optional)
- 80GB SATA HDD

C-Series:

Crossbeam C25

- 2 Xeon CPU
- 2GB RAM
- 2 x 80GB SATA HDD (RAID 1)

Crossbeam C12

- 1 Xeon CPU
- 2GB RAM
- 1 x 80GB SATA HDD

Other Components

- **Internet Browser:** Microsoft Internet Explorer 6 SP1 or Firefox 1.5 to access the Web-based administrative console
- **Database:** Postgres SQL v8.1.3 or above
- **LDAP servers:**
 - Microsoft Active Directory 2000 or 2003
 - IBM Lotus Domino 6.0 or above
 - Sun One LDAP
- **MTA:** Postfix 2.1 or above

TRUST THE EXPERTS IN THREAT PROTECTION

Trend Micro is a recognized global leader in Internet Secure Content and Threat Management with 20 years in the security industry. Trend Micro focuses on securing the exchange of digital information with in-the-cloud, gateway, server, and desktop solutions on multiple form factors.

Trend Micro threat scanning is based on in-house technologies, allowing Trend Micro to provide superior effectiveness and support. These technologies are backed by TrendLabsSM, a global network of threat research, service, and support centers staffed 24/7 by threat intelligence experts around the globe, ensuring constant threat surveillance and attack prevention.

A pioneer and industry vanguard, Trend Micro is advancing integrated threat management technology to protect operational continuity, confidential information, and network resources from malware, spam, data leaks, and the newest Web threats.
